Education

Full Stack Web Development

Masai School, Bengaluru

Mar 2022- Dec 2022

B.Tech In Bioengineering and Technology

Gauhati University, Guwahati

Aug 2017- Sept 2021

Subham Dey

Full Stack Web Developer

Experience

Backend developer at Honeysys - Jan 2023 - Present

Key of Responsibility

- Built REST APIs using microservice architecture to enable seamless communication between the front-end and back-end components.
- Developed an import-export module by which we can create or update data using an Excel sheet.
- Handled the backend of an internal project called Pagebuilder in which we can control the various page components from the super admin dashboard.
- Build a feature where a CronJob will remove all the corrupted product variant images from the catalogue.

Tech Stacks: NodeJS, ExpressJS, Loopback, MongoDB

Projects

[Tweeter-GIPHY.com](#)

This is a social media website where users can upload GIFs with captions, like and follow other users' postings, as well as edit and delete their own content.

Tech Stack: NextJS | ReactJS | Redux | NodeJS | ExpressJS | Chakra UI | MongoDB | Nodemailer.

Features :

- Login and Signup via the joi Authentication system.
- Updating the Profile (Username and password).
- Search for a gif and Post it, like other users' posts.
- Password reset using email verification.

This was a solo project that was completed in 15 days.
