Time Management

Subham Dey

Full Stack Web Developer

Professional Summary

Aspire to create some good web applications by leveraging my skills in Frontend and Backend development by producing production-ready code. A team player and a collaborative developer having Leadership, Management, and teaching skills who is strongly interested in working in a product-based company. Have built some amazing clones of some of the well-known web applications collaboratively as well as individually.

Projects

Medimed.com

Medimed.com is inspired by Netmeds.com, Netmeds.com is a trusted Indian online pharmacy where users can buy medicines.

Tech Stack : ReactJS | Redux | JavaScript | NodeJS | ExpressJS | Firebase | React Router | Chakra UI | MongoDB | Paypal payment gateway

Areas of responsibility:

- Developed the Signup, Login, UserProfile, and Paypal gateway frontend
- Developed the OTP Authentication using Firebase auth
- Built the whole Authentication backend

This was a team project built by me including 3 other team members in 7 days time period.

Tweeter-GIPHY.com

This is Social media website where users can post GIFs along with a caption, like other people's posts, follow other people as well the user can delete, and update his/her own posts and username.

Tech Stack: NextJS | ReactJS | Redux | NodeJS | ExpressJS | Chakra UI | MongoDB | Nodemailer.

Features :

- Login and Signup via the joi Authentication system.
- Updating the Profile (Username and password).
- Search a gif and Post it as well as like other users posts.
- Password reset using email verification.

This was a solo project built in within a time period of 20 days.
